

NATIONAL

HPV Conference

Let's get on track to end HPV infections

APRIL 15 - 17, 2025

**HYATT REGENCY
INDIANAPOLIS, INDIANA**

About This Conference

Human Papillomavirus (HPV) is known to cause six types of cancers in all genders. Despite availability of a vaccine, the U.S. continues to see an alarming rate of HPV transmission and HPV-related cancers. Professionals at the national, regional, state, and local levels are working tirelessly on evidence-based practices and want to collaborate with others to increase prevention, early detection, and treatment of HPV-related diseases.

Hosted By

INDIANA
IMMUNIZATION
COALITION
#VACCINATEINDIANA

The goal of this inaugural conference is to invite all U.S. professionals working in the HPV space to come together in an effort to learn and share. While many conferences strive to include HPV as one of many topics, this conference seeks to make HPV the main topic. Attendees will enjoy learning and connecting with peers, while forming new ideas and partnerships to make their own HPV-related efforts stronger.

Together, we can strive to eliminate HPV-related diseases and cancers in the U.S.

National Planning Committee

These national partners are playing an important role in helping facilitate this conference. They offer significant value by providing support, expertise, and connections among attendees. These partners are working to make the National HPV Conference a more comprehensive and valuable experience for all participants.

The national planning committee consists of members from:

- American Cancer Society
- American Cancer Society National Roundtable on Cervical Cancer
- American Cancer Society National HPV Vaccination Roundtable
- Centers for Disease Control and Prevention
- Indiana Immunization Coalition
- St. Jude Children's Research Hospital
- Unity Consortium

Intended Audience

The intended audience for this conference is wide-reaching by design. The goal of the conference is to convene professionals who work in many different areas of the HPV continuum in an effort to create partnerships and collaboration. During this inaugural conference, we anticipate 350-500 attendees. The gathering is specifically aimed at professionals in the U.S. who work in and with the public regarding HPV. Some examples of these professionals are:

- Advocates
- Community Health Workers
- Epidemiologists
- Health Educators
- Health Policy Professionals
- Healthcare Providers, e.g.:
 - Nurses
 - Physicians
 - Social Workers
 - Navigators
 - Pharmacists
 - Dentists
 - Healthcare students / trainees
- Local, Regional, and National Stakeholder Groups
- Public Health Organizations
- Researchers, e.g.:
 - Dissemination, Implementation, and Translational Sciences
 - Health Behavior
 - Health Communication
 - Health Informatics
 - Health Psychology
 - Promotion and Marketing
 - Public Health
- Sexual Health Organizations

Expected Outcomes

The National HPV Conference was established to create a venue for networking, dissemination of best practices, resource sharing, and cross collaboration in a way never done before in the United States. We are excited for the opportunity to have HPV champions across key sectors convene together to advance HPV prevention efforts nationally. This inaugural conference will allow participants to:

- Connect with like-minded people from across the country
- Share and learn from others' experiences
- Stimulate new ideas
- Identify ways to collaborate locally and across state lines
- Develop actionable work plans to implement at home
- Unite in efforts to achieve our central goal of eliminating HPV infections in the U.S.

Focus Tracks

Vaccination & Prevention

This track will focus on measures to prevent HPV infection, including education, advocacy, policy, vaccination, sexual health, health disparities, and more. Speakers will be encouraged to share programs, practices, and materials that have been successful in the realm of HPV prevention. Participants will leave with new ideas and actionable items.

Research & Best Practices

This track invites area experts and researchers to present findings directly related to public-facing HPV care and prevention. Presentations should not be overly technical. Applicable topics might include health equity, best practices, health communication, dissemination, or implementation science.

Cancer Screening & Treatment

This track is focused on the screening and treatment of HPV-related cancers. Innovative and emerging methods, as well as those with high compliance and success, should be discussed. Topics might also include related policy and metrics. As with all tracks, presentations are aimed at those in public-facing environments to aid in understanding and communication.

Public Health & Collaboration

This track seeks to help organizations collaborate and engage to further public health initiatives around HPV. Applicable topics might include health disparities and equity, legislation, policies, examples of successful partnerships, and public health outreach programs.

Vaccination & Prevention

- Education
- Advocacy
- Vaccination
- Sexual Health

Research & Best Practices

- Communication
- Psychology
- Messaging
- Guidelines

Cancer Screening & Treatment

- Screenings
- Testing
- Innovation
- Survivorship

Public Health & Collaboration

- Data
- Outreach
- Advocacy
- Local Efforts

Event Schedule

April 14, 2025

Arrival day. Exhibitors will have this time to move in and set up booths. In the evening there will be a special event to welcome everyone and network.

April 15, 2025

Starting with an exciting keynote, the first day will feature a full day of engaging speakers and break-out sessions with breakfast and lunch provided. The exhibit hall will be open all day. Special events may be offered in the evening.

April 16, 2025

The second day will continue to host a variety of educational content with breakfast and lunch provided. The exhibit hall will be open all day featuring vendors and poster presentations. Special events may be offered in the evening.

April 17, 2025

The third day will be a half day workshop format. Participants will experience networking, problem solving, and sharing to empower more action upon returning home. Exhibitors will depart after the provided lunch.
